University of Missouri System Undergraduate Financial Aid Summary Report FY2001-FY2005

(Missouri Resident Undergraduate Students)

Report Prepared by Dr. La Shonda Carter-Boone Senior Institutional Research Analyst

Office of Institutional Research and Planning

University of Missouri System Undergraduate Financial Aid Summary Report FY2001-FY2005 (Missouri Resident Undergraduates)

Executive Summary

The *Undergraduate Financial Aid Summary Report* includes undergraduate financial aid distribution patterns for the University of Missouri System and the four campuses from fiscal year 2000-01 (FY01) through fiscal year 2004-05 (FY05). In the first part of this report nine questions are addressed at the UM System level:

- 1. How many students received aid and what type of aid was received?
- 2. Has grant aid kept pace with increases in educational and required fees?
- 3. How has the distribution of institutional gift aid changed over the past five years?
- 4. How has the distribution of PLUS loans changed over the past five years?
- 5. What percent of educational and required fees is met by grant aid?
- 6. How has the number of aid recipients with need changed by income level?
- 7. How do financial aid packages vary by income level?
- 8. For students that have need, what is the average amount of unmet financial need?
- 9. Can families afford to pay the expected family contribution?

The second part of the report provides campus-level financial aid distribution patterns for the past five years, which may differ from system-level findings.

Special thanks to the campus financial aid directors who provided valuable assistance and feedback for this report: Joe Camille at UM-Columbia, Jeanette Brandow at UM-Kansas City, Bob Whites at UM-Rolla, and Tony Georges at UM-St. Louis.

System-wide trends highlighted include:

- Total aid to students with need is awarded from a combination of aid based on merit and aid based on need. Over the past five years, there has been a 30.5% increase in the number of financial aid recipients that have financial need. There is no question that there are many more students with need due to the 14.5% increase in the enrollment of resident, full-time, degree-seeking students over the past five years (Figure 1.1). However, an equally significant reason for the increase in students with need is the fact that education and required fees have increased 53.6% and the overall cost to attend the University has increased 36.1% during the same time period (Figure 1.2). In other words, many students that otherwise would not have had a financial need became needy.
- There is a steadily widening gap between educational and required fees and the average grant aid awarded to undergraduates, particularly in the last two years (Figure 1.2).

• Financial aid awarded from institutional sources increased over the past five years with a significant increase in the number of awards that went to students with

The contextual basis of financial aid distribution

Less than 20% of undergraduates attending the University of Missouri pay the entire cost of attendance out-of-pocket. The majority of students receive some type of financial assistance to attend the University in the form of grants, scholarships, work study or loans. In addition, financial assistance comes from a wide variety of sources including the state and federal governments, profit and non-profit organizations, and the University (institutional gift aid). In addition, a significant amount of financial aid that is distributed is based on financial need (i.e. it is documented that the student's family cannot afford the entire cost of attendance). A student must complete a Free Application for Federal Student Aid (FAFSA) in order to determine the extent of financial need and the type and amount of aid based on need that can be awarded.

Many of the tables and figures throughout this report reference terms such as budgeted cost of attendance, financial need, grant aid, and unmet need. Assuming that a student has completed a FAFSA, Figure A.1 is provided to give an overview of how a student's financial aid package is determined.

Figure A.1 Example of How Financial Need is Determined and Aid is Distributed

\$14,000	Budgeted Cost of Attendance {
(4,000)	Less: Expected Family Contribution
10,000	Financial Need
<u>(3,500)</u> 6,500	Less: Grant Aid Remaining Need
(1,000)	Less: College Work Study
(4,000)	Less: Need-Based Loans
(500)	Less: Alternative Loans
\$1,000	Unmet Need

Section I

System-wide Financial Aid Trends of Full-Time, Degree-Seeking Missouri Undergraduates from FY01 to FY05

PLEASE NOTE: The findings below highlight system-w

educational and required fees for students with income less than \$20,000 and 88% for students with income between \$20,000 and \$40,000. By FY05, grant aid covered 77% of educational and required fees for students with income less than \$20,000 and 75% for students with income between \$20,000 and \$40,000. The overall trend is that grant aid continues to cover a smaller percentage of the educational and required fees for all students regardless of income, but students in lower incomes are impacted the most (Table 1.2).

6. How has the number of aid recipients with need changed by income level?

There has been a change in the number of aid recipients with need by income level. The number of aid recipients with need and incomes lower than \$40,000 increased slightly. On the other hand, there has been a significant increase in the number of aid recipients with need and incomes over \$60,000. Overall, the University continues to experience an increase in the number of higher-income students that require financial assistance to meet the cost of attendance (Figure 1.3).

7. How do financial aid packages vary by income level?

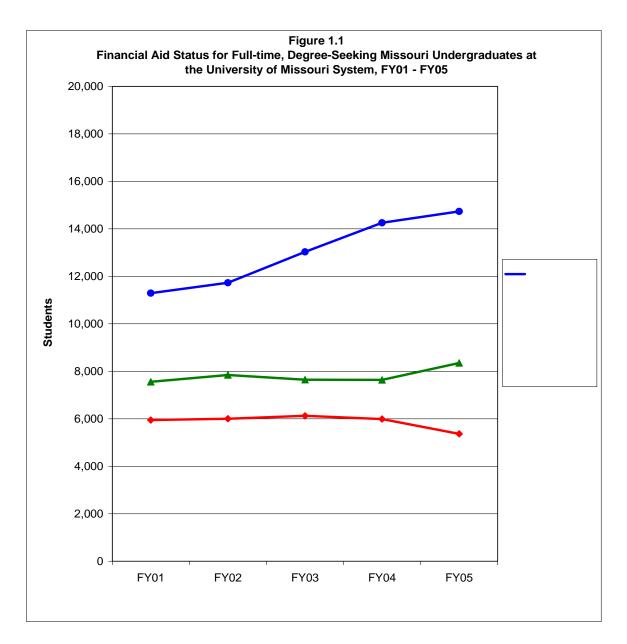

Students with incomes less than \$40,000 have the highest amount of financial need and receive larger total financial aid awards than higher income students. However, by income level, there is a difference in the structure of the financial aid packages and the way that financial need is met. For example, in FY05 for students with incomes over \$60,000 nearly half of financial need was met with grant aid, and non-grant aid covered most of the remaining need. At the same time, for students with incomes less than \$40,000 less than half of financial need was met with grant aid, and the remaining unmet need of these students was nearly 30% of the cost of attendance. Thus lower-income students continue to have the largest amount of unmet financial need (Figure 1.4 and Table 1.3).

8. For students that have need, what is the average amount of unmet financial need?

Over the past five years, the structure of financial aid packages has changed across all income levels. For example, five years ago, students with incomes greater than \$60,000 received financial aid packages that nearly covered total financial need. Over the past five years, the amount of unmet need has steadily increased for students with incomes greater than \$60,000. The change in financial aid packages was more drastic for lower income students. In FY05, even though lower income students received slightly larger grant and non-grant awards, their financial need increased substantially. Subsequently, the unmet financial need of lower income students has nearly doubled over the past five years (Figure 1.5).

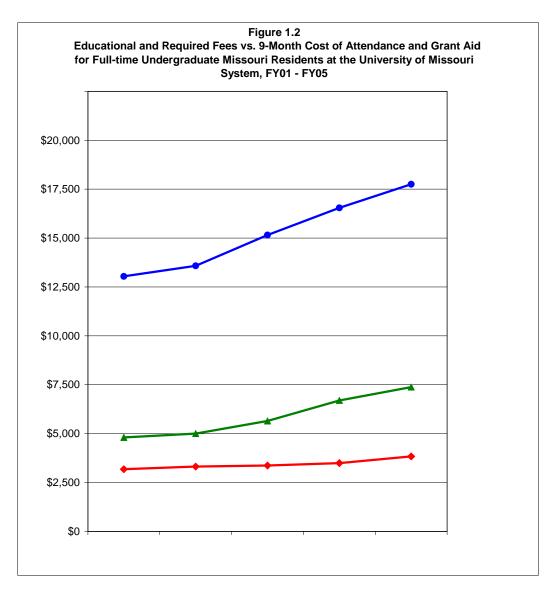

9. Can families afford to pay the expected family contribution?

On average, families borrow a portion of the amount that it is expected to pay out-ofpocket (i.e. the expected family contribution). However, higher income students borrow
