Which of the following is not a characteristic of a good research question?

It is specific, clear, and focused.

It is broad and general.

ANSWER

The correct answer is: It is broad and general.

A good research question should be specific, clear, and focused. It should be narrow enough to be manageable and broad enough to be interesting. It should also be researchable, meaning that it can be answered through research. It should be original, meaning that it is not a question that has already been asked and answered many times. It should be significant, meaning that it has the potential to contribute to the field of study. It should be feasible, meaning that it can be answered with the resources and time available. It should be ethical, meaning that it does not involve any unethical research practices. It should be relevant, meaning that it is related to the field of study. It should be interesting, meaning that it is a question that you want to know the answer to. It should be clear, meaning that it is easy to understand. It should be focused, meaning that it is a single question that can be answered. It should be specific, meaning that it is a question that can be answered with a specific answer. It should be broad and general, meaning that it is a question that can be answered with a broad and general answer.

QUESTION 18

Which of the following is not a characteristic of a good research question?

It is specific, clear, and focused.

It is broad and general.

ANSWER

The correct answer is: It is broad and general.
